

Career Ambassador Program

Are you looking for a professional from the life sciences to speak at a career exploration event? Expand your students' interest in the life sciences by hosting a MassBioEd Career Ambassador to speak with your students!

The Career Ambassador Program broadens students' horizons and will open their minds to the many possible career opportunities available in the life sciences. Through this program, industry volunteers share their experiences and their passion for the work they do. Some Career Ambassadors focus on the science behind their work and research, while others will focus on careers in the life sciences outside of the laboratory. We can connect your students with professionals from a range of educational and personal backgrounds.

Our Volunteers:

Career Ambassadors come from **all areas** of the life sciences industry. Some careers are listed below but not limited to:

- Lab Scientists
- Biomanufacturing Technicians
- Research Associates
- Data Scientist
- Product Developers/Managers
- Human Resource
- Marketing
- Sales
- Finance
- Law

Career Ambassador Events:

Whether you are holding a career panel or looking for professionals to speak directly to your class, our Career Ambassadors will bring their professional insights and personal stories to connect with your students. **All Career Ambassador events will be virtual through 2021.**

Event Type	Time Frame
Classroom Speaker	30 minutes - 1 hour
Career Panel	1-2 hours
Informational Interview	15 - 30 minutes
Virtual Classroom Support	1 hour
Science Fair Judge	TDB
