

## Devereux Student Strengths Assessment (DESSA-mini)

(DESSA-mini: 3)

### McAvinnue Elementary School Site Report

<b>Record Form:</b>	DESSA-mini Form 3	<b>Rater Type:</b>	Educator
<b>Date:</b>	9/7/2020 - 2/9/2021	<b>Program:</b>	Lowell Public Schools
<b>Rating Period:</b>	A: Fall 2020		

60 and above	Strength	41-59	Typical	40 and below	Need
--------------	----------	-------	---------	--------------	------

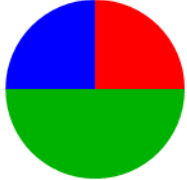

### Interpreting Scores

**T-Scores** Each DESSA T-score is a standard score set to have a mean of 50 and standard deviation of 10. Like the percentile scores, T-scores are based on the ratings received by the children in the standardization sample. In contrast to percentile scores, however, DESSA T-scores have the same meaning throughout their range. T-scores should always be used when reporting the DESSA results and when comparing scores earned on the various scales.

**Percentile Scores** DESSA raw scores are converted to percentile scores using the appropriate norms tables. Percentile scores compare the child's behavior to that of other children who have been rated using the Devereux Student Strengths Assessments. The percentile score indicates the percentage of children in the standardization sample who earned the same or lower raw score.

**Scale Description** High scores (T-scores of 60 and above) are referred to as strengths. This range of scores is indicated by gray shading on the Individual Student Profile. T-scores that fall between 41 and 59 inclusive are described as typical. Low scores (T-scores of 40 and below) are described as a need for instruction. This range of scores is indicated by red shading on the Individual Student Profile. Children with scores in this range can be considered at risk for exhibiting or developing social-emotional problems. On each scale, approximately 16% of the children in the standardization sample received scores in the need for instruction range. It is recommended that a plan be developed and implemented to assist the child in developing these important skills.
