# McAvinnue's Faculty "Needs Assessment"

1. When considering your students and student achievement results across the school, what works? Why?
2. In your opinion, what needs to be improved to increase student achievement in your classroom, within the school, and what data are you using to validate your thinking?
3. As you think about student achievement in your grade level team, what long term planning or ideas do you have for supporting higher student achievement?
4. What instructional intervention is most successful in your classroom? Why is it successful?
5. What is your greatest professional development need?

# McAvinnue's "Problem Of Practice"

*Due to the need to adjust the manner in which instruction occurred for our students over the past 2 years, McAvinnue will need to design tiered intervention groups that have an identified and targeted core deficit that is paired with a robust intervention model utilizing a specific program to address the reading and mathematical needs of our students.*

*McAvinnue will continue to implement targeted Tier II interventions in reading and mathematics implemented by our designated intervention tutors, instructional para-educators, and classroom teachers using predetermined and targeted programs that specifically address the core deficits of our students. This intervention model will include systematic progress monitoring and adjustment of targeted student groupings as well as the identified core problem of each of the students.*
