

Scavenger Hunt

Instead of finding misplaced items, send children on a scavenger hunt around the House. This may help them take note of where key functional household items such as the broom, the sink, bathroom or cooking essentials are located. Make sure you require a description of the items you are asking them to find.

Also, Provide them with an item key hinting toward the things that they are looking for. The key does not have to name the item but describe it using characteristics or phrases

Feel free to modify this activity to suit the needs and amount of the participants
