# McAvinnue's "Needs Assessment"

1. When considering your students and student achievement results across the school, what works? Why?
2. In your opinion, what needs to be improved to increase student achievement in your classroom, within the school, and what data are you using to validate your thinking?
3. As you think about student achievement in your grade level team, what long term planning or ideas do you have for supporting higher student achievement?
4. What instructional intervention is most successful in your classroom? Why is it successful?
5. What is your greatest professional development need?
